Details:

Not every move happens in a single, tidy step. Settlement dates don't always line up, new premises aren't always ready on day one, and sometimes you simply need somewhere secure to keep your belongings while you sort out the next stage of a relocation. That's where combined storage and moving services come in — and it's an area where a joined-up approach between packing, transport, and storage genuinely reduces the stress of a move.

Why Storage and Moving Go Together

When storage is handled as part of the same service as your move — rather than as a separate, disconnected arrangement — your belongings are only handled once by the same trusted team who packed and transported them. That means fewer handovers, fewer opportunities for items to be mishandled, and one point of contact for the whole process rather than juggling multiple providers.

Storage Options to Suit Different Needs

Storage requirements vary enormously from one move to the next. Some clients need a large volume of space for months while a new build is completed; others simply need a week of breathing room between settlement dates. Monthly storage options are available at different capacity tiers — for example, around 40 cubic metres for larger households or businesses, and smaller allocations of roughly 20 cubic metres for more modest needs. Short-term storage, measured in single weeks, is also available for those quick-turnaround situations where you just need somewhere secure for a matter of days.

What Happens to Your Items in Storage

Storage isn't just about having a place to put things — it's about ensuring they stay protected the entire time they're there. Items destined for storage are packed to the same standard as those going straight to a new address: properly wrapped, boxed, and documented. Artwork and pictures, for example, must never enter storage with bubble wrap as their only protection — full wrapping and cardboard covering are required before anything goes into a storage facility.

Insurance and Peace of Mind

Storage insurance is available as a complement to your moving insurance, giving you an extra layer of reassurance while your belongings are held in a facility rather than in your own home. It's a small addition that removes one more point of uncertainty from the process.

Ideal Scenarios for Storage-and-Move Services

Combined storage and moving services suit a wide range of situations: downsizing when your new home is smaller than your current one, renovations that require temporary relocation of furniture, staggered settlement dates on property sales, or business relocations where new premises need fit-out time before your equipment and stock can move in.

A Seamless Relocation, From Pack to Placement

At Fragile Removals, we handle the packing, the transport, and the storage as one continuous, professional and courteous service — so your belongings are cared for at every stage, not just the parts that happen to be convenient. If your move involves a storage gap, talk to our team early so we can build it into your plan from day one, not as an afterthought.
